The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7, 9 and 10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Behan (5,374,614 or EP 0,572,080).

Behan discloses a perfume that contains a microemulsion containing all of the ingredients that are set forth in the claims.

Claims 1-10, 13 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not seen that any and all microemulsions are contemplated in the practice of the invention. It is seen that only edible microemulsion are contemplated.

Claim 6 contains a number of trademark/trade names. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte*

Simpson, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe an emulsifier and, accordingly, the identification/description is indefinite.

Claims 1-10, 13 and 15 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for edible microemulsions, does not reasonably provide enablement for any and all microemulsions. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims.

In view of the papers filed May 30, 2002, it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR 1.48(a). The

inventorship of this application has been changed to delete inventor Gautier.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of the file jacket and PTO PALM data to reflect the inventorship as corrected.
